

DIGI-MAX D1000, MULTI-MAX F1000 & MULTI-MAX F2000

DIGI-MAX D1000, MULTI-MAX F1000 & MULTI-MAX F2000

DIGI-MAX D1000

The Digi-Max D1000 is specially designed and equipped to meet the needs of Eberspaecher's Airtronic line of air heaters. This controller includes an array of useful features and an LCD screen to ensure optimum user-friendliness and programmability.

MULTI-MAX F1000 *

The Multi-Max F1000 controller is a fully programmable controller, specially designed for use with Eberspaecher's line of Hydronic coolant heaters. The unit is controlled by pre-determined settings stored on a Micro SD card and would be the ideal solution for those managing fleets of vehicles.

MULTI-MAX F2000 *

The Multi-Max F2000 offers all the features of and benefits of the Multi-Max F1000 but includes an LCD screen and additional programmable options. This unit improves ease of use and programmability and would best suit vehicle owners and operators looking for increased flexibility on the road.

* Settings are made with included programmer for Windows by the fleet manager and stored on the Micro SD card
