

## DROP YARD SERVICES

**For added customer convenience, Thermo King dealers across North America now offer Drop Yard Services. Access locations via the easy-to-use Dealer Locator Tool found on Thermo King's webpage or download it to your mobile device. Thermo King offers 40+ locations and over 2200 parking spots in this growing network.**

The drop yard service is part of Thermo King's effort to help fleets and drivers manage hours of service regulations and to help fleets retain drivers by offering convenient and safe parking solutions. The tool also provides additional information, ranging from hours of operation to type of security. A rested driver is a happier driver, and the more alternatives a fleet can offer drivers, the greater the positive impact on driver retention. According to the CSCMP's "State of Logistics" report, the current driver shortage of 30,000 is expected to climb to 300,000 by 2020. Retention is a major financial challenge for fleets, and the cost of replacing a driver averages \$8,000. Thermo King is committed to offering customers real solutions to attract and retain quality drivers.

### *SERVICE AND INSTALLS WHILE YOU WAIT*

Most locations offer services such as trailer refrigeration and auxiliary power unit (APU) service and maintenance. Don't have an APU? No worries: you can have Thermo King's industry-leading TriPac Evolution APU installed by a factory-trained Thermo King technician while you rest. Just contact the Thermo King Dealer and schedule the install while making your drop yard reservation.
