1. Press the ON key to turn the unit on

- The Thermo King Logo will briefly be displayed as the system initializes.
- THERMO K CONFIGURING SYSTEM PLEASE WAIT briefly appears while communications are established and the unit prepares for operation.
- The Standard Display showing box

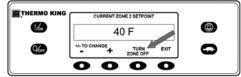

temperatures and setpoints briefly appears next.

- DIESEL ENGINE STARTING appears as the engine preheats and starts. On SmartPower equipped units, ELECTRIC MOTOR STARTING will appear if the unit is connected to standby power.
- The Standard Display showing box temperatures and setpoints appears while the unit is running.
- 2. Press the OFF key to turn the unit off. The unit will immediately shut off and SYSTEM IS POWERING DOWN will appear briefly.

To turn a Zone on or off:

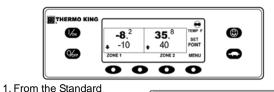

Zone 1 will always be displayed any time the unit is turned on. Zone 2 and Zone 3 (if present) can be turned on and off as desired.

- 1. Return to the Standard Display (press any key to return to the Standard Display).
- 2. Press the ZONE key under the desired zone.
 - The setpoint display appears. If the zone is turned on, the third key will be labeled Turn Zone Off. If the zone is turned off, the third key will be labeled Turn Zone On.

- 3. Press the TURN ZONE OFF key to turn the zone off.
 - The display briefly shows PROGRAMMING ZONE ON/OFF -PLEASE WAIT.
 - The display will confirm the new Zone setting for several seconds.
 - The display will return to the Standard Display showing the Zone is off. The setpoint for the Zone has been replaced with OFF to indicate that the zone is now off.

Simple to Set: CYCLE-SENTRY™ or Continuous Run

Display, press the MENU 12 key to display the MODE Que

menu. 2. When the MODE Menu is shown press the SELECT key.

 TURN OFF CYCLE SENTRY or TURN ON CYCLE SENTRY will appear.

3. Press the SELECT key to change the mode.

Q

occurs, a small alarm Icon will appear within the affected zone as well (example: Zone 2 shown).

- 1. From the Standard Display, press the MENU key.
- 2. Press the NEXT key until the Alarm Menu appears.
- 3. Press the SELECT key.
 - · The Alarm Display will appear.
 - · If no alarms are present, NO ALARMS is shown.
 - If alarms are present, the quantity of alarms (if more than one) and the most recent alarm code number will be shown.
- 4. After the alarm situation is resolved press the CLEAR key to clear the alarm.
- 5. To display the next alarm, press the NEXT key.
- · If an alarm will not clear, it may still exist. If the alarm is not corrected, it will not clear. All alarms must be viewed before any of the alarms can be cleared.
- · If an alarm cannot be cleared from the Main menu, the Clear key will not appear. These alarms must be cleared from Guarded Access Menus.

6. Press the EXIT key to return to the Standard Display.

See Operator's Manual for more information regarding alarm codes.

1. From the Standard HERMO KIN Display, press the High 1/m Speed Lockout key. Q6#
