- Most information that is available on TracKing is also accessible on the app

TK Notify

THERMO KING

- TK Notify allows you to subscribe to and manage your notifications. Each notification comes with additional information on your unit and cargo at the time the event occurred.
- This information includes:
- Temperature Information on Notification Detail Screen
    - SetPoint Information
    - Independent Sensor Information
    - Return Air
- Unit Information on TK Notify Detail Screen
    - Operating Mode
    - Engine Hours, Electric Hours, Total Hours added
    - Reefer Serial Number
    - Vehicle Position
    - Fuel Level
- Closest TK dealership
- You can setup notifications to escalate and/or forward an issue
    - You can escalate events to other people, you can forward events to other people
        - Driver, service tech, etc.

TK Activate

THERMO KING

- This App will help facilitate the dealers to activate a unit right in the yard without having to walk back to the computer!

- The TKActivate App allows authorized users to:

  - Activate a BlueBox Unit

  - Transfer a BlueBox unit from one customer to another

- The unit can be identified by scanning the unit/reefer serial number or by entering the serial number manually.

TracKing Website

THERMO KING

- Able to monitor temp, set point, fuel level, change modes, locate the units, view alarm codes, turn unit on/off, set the unit into pre-trip, geo fences on units
- Reports:
  - 24 hour alarm history
  - Command history
  - Temp history
  - Geo fence history
  - Position and reefer utilization history
  - Multiple customized reports
